Category/Type	***Used Parts for Sale***
Make	***220024 Steinbauer***
Model	***Upgrade Chip for Tractor***
Year	***-***
Hours	***-***

How does it work?

The Steinbauer Power Module modifies the injection system by fine tuning the duration of the injectors. This is achieved by blue printing the original characteristics and intercepting the electronic signals from the ECU to the injection system. The fuel injection and engine speed are recorded and recalculated to optimise performance. Intelligent engine technology Increased power and torque, using fuel injection optimisation. Precision. Achieved. Steinbauer.
